konfrontiert wird, wird aus diesem Register wertvolle Informationen schöpfen können. Es sollte zudem an jeder Universitätsklinik vorhanden sein, da diese ja in Vergiftungsfällen zuerst konsultiert werden. Eine kurze Literaturübersicht über die wichtigsten Monographien auf dem Gebiete der Gifte vervollständigt dieses wertvolle Buch. R. SCHUPPLI, Basel

News

14. und 15. April 1972

XII. Kongress der Deutschen Gesellschaft für Allergie- und Immunitätsforschung in Wiesbaden

Vorsitz: Prof. Dr. med. M. WERNER (Pinneberg)

Hauptthema: Arzneimittellallergie

Auskunft: Prof. Dr. med. W. GRONEMEYER, Deutsche Klinik für Diagnostik, Sektion Allergologie, Aukammallee 33, D-62 Wiesbaden (BRD), Tel. 06121/ 38 81.

Karl-Hansen-Preis

Preisarbeiten in deutscher Sprache aus dem Gebiet der Allergie- und Immunitätsforschung sind bis zum 1. Dezember 1971 an den Vorstand der Deutschen Gesellschaft für Allergie- und Immunitätsforschung, z. Hd. des Schriftführers, Prof. Dr. med. W. GRONEMEYER Deutsche Klinik für Diagnostik, Sektion Allergologie, Aukammallee 33, D-62 Wiesbaden (BRD) einzureichen.

Erratum

In der Kurzmitteilung von T. ŠALAMON, A. MUSAFIJA und M. MILIČEVIĆ «Alopecia areata und Erkrankungen der Thyreoidea», Vol. 142, No. 1 (pp. 62–63), 1971 sind die folgenden Fehler zu berichtigen:

Die 3. Zeile des Abstract auf Seite 62 muss richtig lauten:

'gland and thyroid uptake test was performed. 46 patients were euthyroid, one female hypothyroid.'

Die 3 letzten Zeilen von S. 62 und die beiden ersten Zeilen von S. 63:

«Thyreoidea durchgeführt und das T_{24} bestimmt. Bei 20 Patienten wurde noch die Bestimmung des $PI-J^{131}$, bei 5 die des PBJ^{131} vorgenommen. 46 Patienten mit AA wiesen euthyreoidale Werte des T_{24} auf, nur eine Patientin zeigte hypothyreoidale Werte ($T_2=8\%$, $T_{24}=4\%$, $U_{24}=43\%$, $PI-J^{131}=0.101\%$ D/L.)»

Die 3. Zeile der Zusammenfassung:

«reoidea und Speicherteste bestimmt. 46 Patienten wiesen euthyreoidale, eine Patientin hypothy-»
